

Nordheim ISD

Early Childhood Screening

Nordheim ISD will be taking appointments for Early Childhood Screenings on May 27th, 2026 from 10 am to 12 pm. The screening will be for children ages three to four years of age by September 1, 2026.

In connection with this screening there will be an Early Childhood Screening conducted by representatives from the Region III service center in Victoria. This screening is for the children below the age of three.

The purpose of the screening is to measure a child's developmental level and to determine if learning disabilities may exist. Early childhood intervention programs serve children with developmental delays and their families. These children need additional help or special experiences before he or she enters school. Children may receive services from an ECI program if they have a significant developmental delay in one or more of the following areas: learning, movement, ability to talk, ability to understand and get along with others.

Children who are determined to have atypical development delays are also eligible. Eligibility is determined through screening or team assessment by program staff. Please call Nordheim ISD at 361-938-5211 if you would like to schedule an appointment if you wish to have your child screened.
